Continuation of 3. The newly added limitations in the proposed amendment, for example, the phrase "controlling the level of pressure" and defining the target value as a ventilation value in claim 112, and "providing ventilatory pressure support" in claims 113-134 raised new issues which would require further consideration and search. It is noted that the proposed amendment doesn't compliant with 37 CFR 1.121 because markings are missing in the amended claims. It is also noted in applicant's arguments/remarks that applicant gives a defintion and an explanation of the otherwise broad terms, "control response" on page 8 para. 2, "target value" on page 12 para. 2, and "response speed" on page 13 para. 1, for example. However, the arguments are irrelevant because the stated defintions and explanations for these terms are not found in the claim 112 language.
